

ERA4221 Sustainable supply chain

2 ECTS

Introduction & Objectives

This learning activity is part of the EU ERA422-Sustainable Trade (5.0 ECTS credits).

This course is meant to develop supply chain management skills and understand how it can be transformed into a sustainable approach.

Learning content

- Supply chain management and strategic decision.
- Sustainability expectations in the supply chain, the power of industry collaboration and multi-stakeholder partnerships
- Sustainable Supply chain processes

Learning Outcome

At the end of the modules, the expected learning results are:

- Understand the sustainable supply chain and how this is applied in business
- Develop critical thinking on how to establish sustainability in company operations

Methodology

The methodology is a mix of:

- Learning sessions at EPHEC: theoretical aspects, presentations, case studies
- Field visits and testimony
- Presentation by the student

Learning material

Powerpoint presentation, online resources, field visit (if possible), testimony/conference

Evaluation

30% Continuous assessment (assignments)

70% Final exam (written or oral)
